EXCELLENCE IN EDUCATION

Dunamis is multi-faceted company offering various online services including software development (app creation), social media management, online advertising, website creation etc. offers Lokate Student apps for educational institutions & transportation companies.

The Lokate Student App ecosystem is one of leading solutions in the Middle East region to offer end-to-end child/bus tracking solutions thus connecting the parents to the school transportation system.

Notifications & other custom services provide parents & school authorities accurate information & peace of mind through advanced cloud based functions.

The Lokate Student ecosystem consists of 3 apps running in-sync with each other and thus providing complete details of the children as they enter & exit the bus.

Location tracking of the bus is made available for the parent & the school transport supervisors to view.

The following are the 3 apps:

PARENT APP

App for parents to download on their phones (iPhones & Android Phones) & tablets (iPads & Android tablets)

BUS APP

App for bus assistants to scan the RFID cards of children as they enter & exit the bus. It also provides the location of the bus as the children are picked-up/dropped-off.

SUPERVISOR APP

App for supervisors to view information of the children & the buses in real-time.

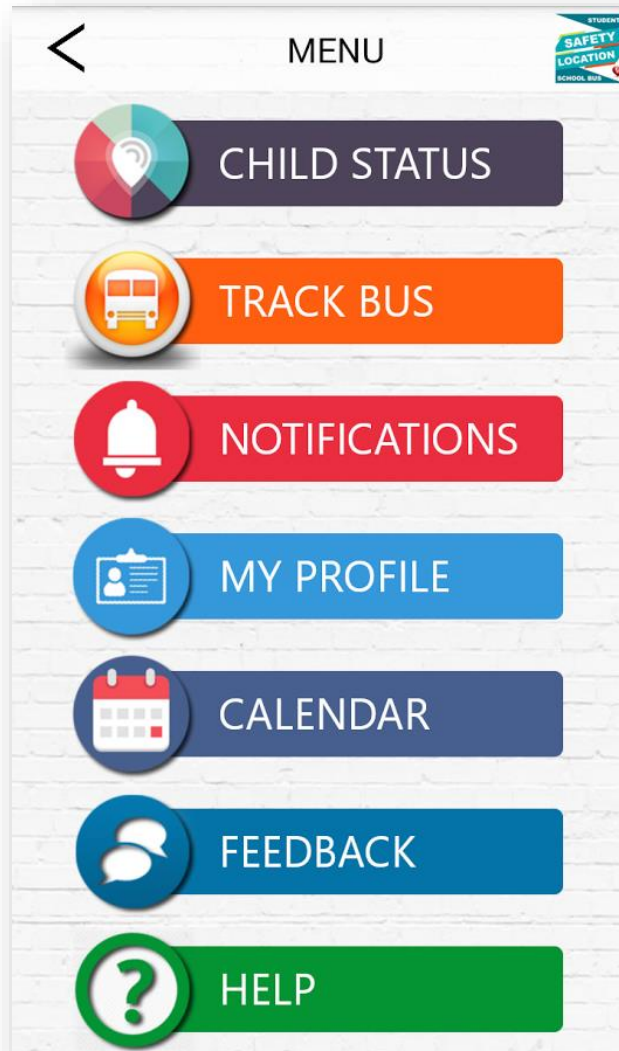

Parents receive notifications & can view the bus on a map

Apps available for Android Phones & iPhones

Multiple children in the same school can be displayed simultaneously

Notification are received as & when the children enter/exit the bus

Available for Android Phones & iPhones

Latest updates are sent through the respective app stores

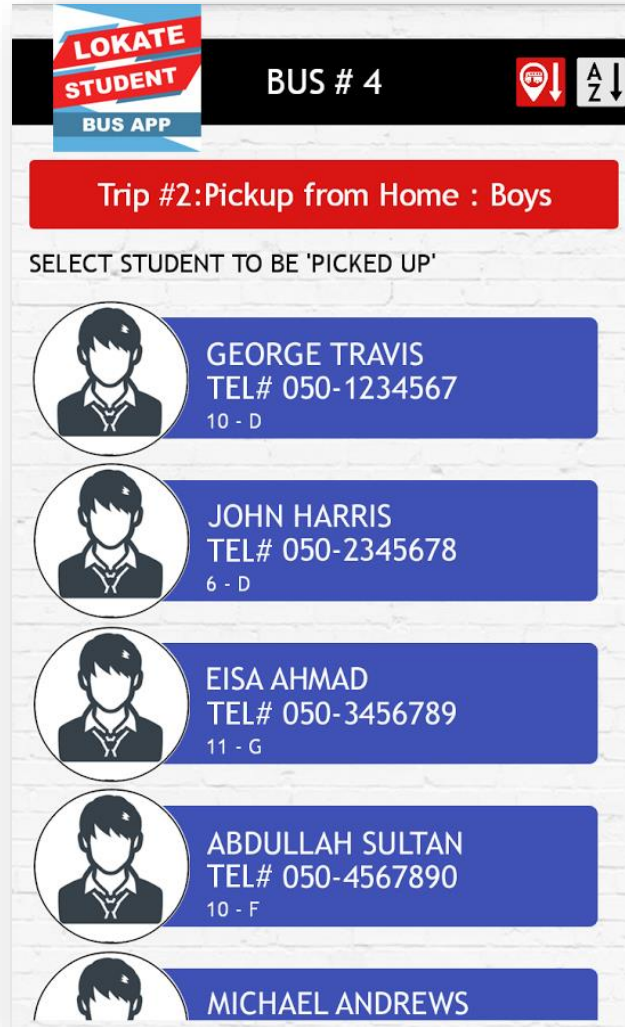

For bus assistants & nannies

Children are provided RFID cards which are scanned as they enter/exit the bus.

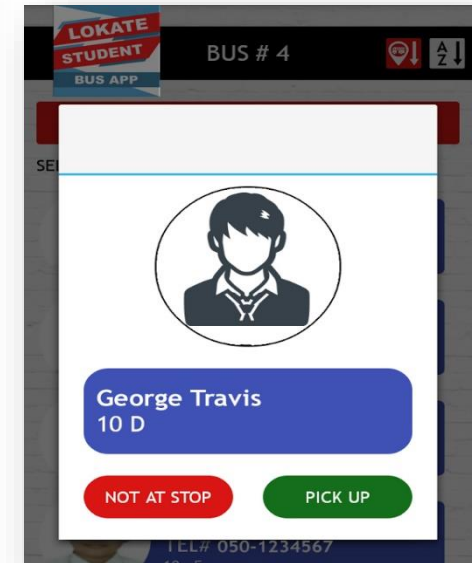

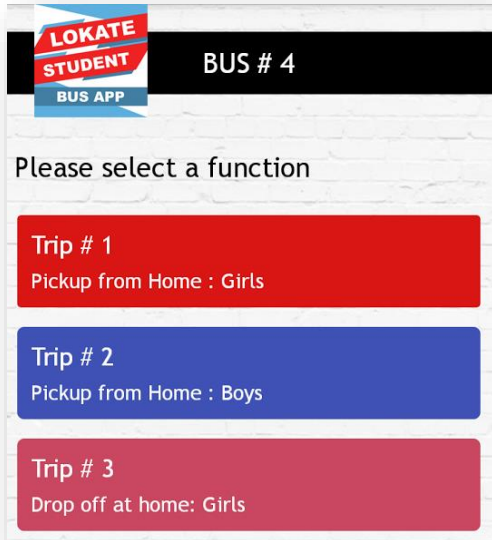

Automatic selection of trip as per time of day

Automatic populating of the student list

On-screen controls

Pickup using on-screen buttons in-case of forgotten card

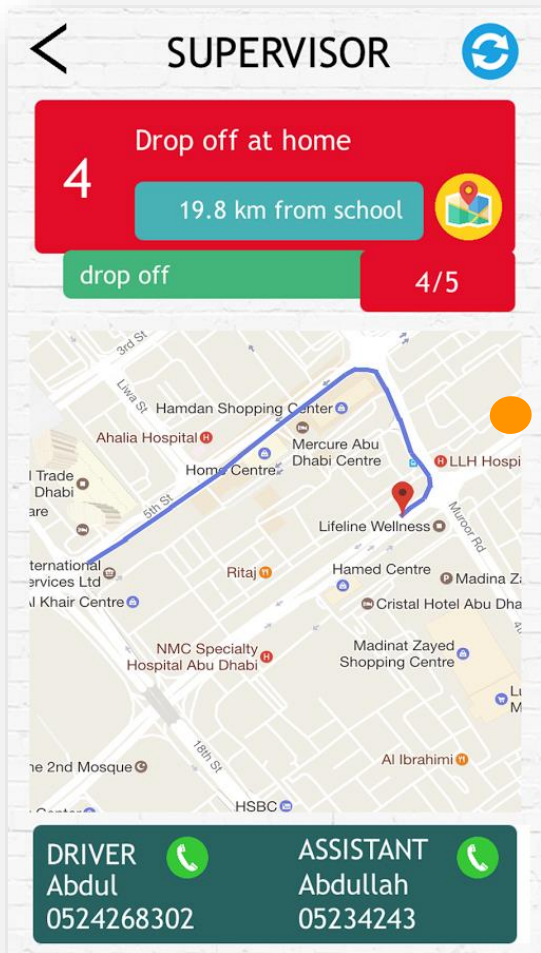

SUPERVISOR APP

Tool for school to manage their buses & students travelling in it

Transport supervisors will be able to monitor all students & buses real-time

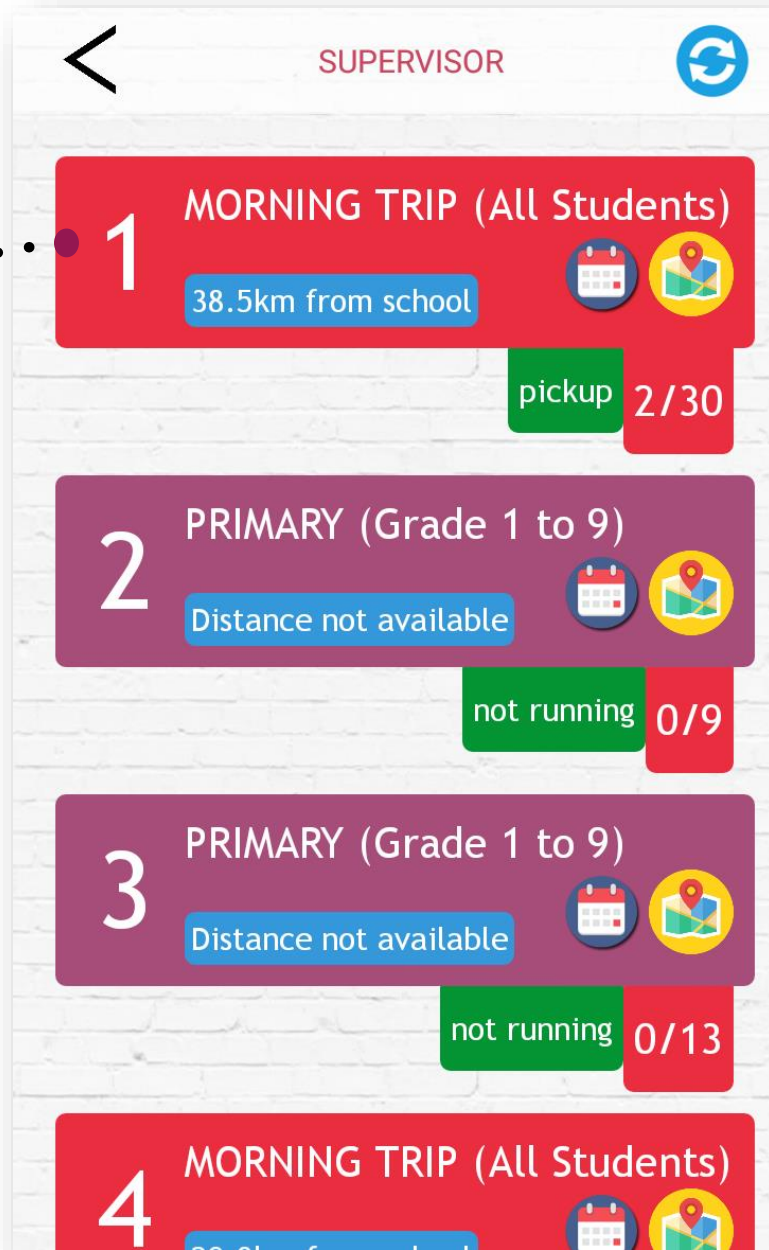

(App available for iPhones & Android phones.)

Color coded boxes with info of distance from school, student count & location of the bus on a map.

Displays the present location of the bus on a map.

Ability to call the driver or assistant instantly

SALIENT FEATURES

No device installations on the bus

In-case of accident or break-down, the bus assistant with the students and scanning device moves into another bus & the trip continues.

A completely 'cloud' based solution

Parents can receive notifications on multiple devices (father/mother phone)

SMS Integration possible (if required)

REQUIREMENTS

NFC compatible phone for each bus

ETISALAT SIM with Cellular data package for each phone

500MB per month for 3 trips a day

Lokate Student Ecosystem

Parent App, Bus App & Supervisor App
(Pricing based on Number of students per location of school)
